### Installation Tips:

- Please identify the power supply's input and output before installation.
- Ensure correct output + & - wire connection.  
Power on after wire connection is done.
- To avoid voltage drop and loading capacity wasting on the output extension wire, please install the power supply to the loading as near as possible, if must use long extension wires, thicker wires and less loading wattage is required.
- The power supply to be installed at good ventilation and cooling environment.
